1. The activities of the Communist Party in countries controlled or governed by the US and Great Britain will follow the line of nationalist revolutions.
2. Experiences in Greece, Palestine and France clearly show that Communists' sponsorship of full independence and freedom from Anglo-Saxon interference leads to an increase in nationalist feelings and a desire for freedom. At the same time it provides opportunity for the creation of a united national bloc, composed of all parties and factions, based on the support of the masses which can easily be led to believe in such a program even if some of their leaders wish to impede it.
3. The Communists have been instructed to awaken and incite national pride, suggesting at the same time elimination of foreign (Anglo-Saxon) interference in the internal affairs of the country.
4. Communist agents have been given the task of bringing about a clash between the general desire of the nations for full independence and the attempt of Anglo-Saxon capitalists to limit such independence.
5. The Communist offensive will not stop in Europe. The Politburo is planning to create inflammatory centers in Africa. Egypt will be the first to go because the Suez Canal guarantees a free route to India and is the key to half of the Mediterranean. The conquest of Egypt by Communist penetration will eliminate the use of Anglo-Saxon bases in that part of the world, and will be a most efficient blow to the security of the British Empire and its lines of communication.
